## **MAIN PROJECT WORK TITLE :**

### **MODIFICATION OF HYDRAULIC SYSYTEM FOR WALKING BEAM REHAEATING FURNACE.**

**DESCRIPTION :** The present hydraulic system in terms of performance and reliability is more than satisfactory. In the event of occurrence of a repeat problem the solution is available in case of a one-off problem it becomes laborious as there are numerous check points compared to the modern hydraulic system.

Due to technological obsolescence and the high rate of up gradation the availability of spares and its associated techno economics influence the running of the system. In such cases

sustaining an old system economically is not feasible and up gradation to an updated system is not a matter of choice but a matter of compulsion.
